

Candiwall Technical Data Sheet

Candiwall Brick Slips

Burnham Smooth Buff

All Candiwall brick slips are made from natural clays without using pigments or additives. High performance clays are used to create the best possible finish. Fired at temperatures of 1100°C durability is assured and of course, you can use any of the Candiwall range of slips for internal or external applications.

Properties:

- High compressive strength
- Low Water absorption
- High dimensional stability
- Acid resistant
- 100% recyclable

Certification:

- Certified to European Standard EN14411

Stretcher Slips All styles	220x14x65mm	0.36Kgs	22 Kgs	60 slips /m ²
Corner Pistol Slips All Styles	220/105x14x65mm	0.54Kgs	8 Kgs	14 corners per lin mtr
Stretcher Slips All styles	220x14x50mm	0.28Kgs	22 Kgs	76 slips /m ²
Corner Pistol Slips All Styles	220/105x14x50mm	0.54Kgs	8 Kgs	17 corners per lin mtr

BURNHAM SMOOTH BUFF

SMOOTH SURFACE

The Burnham has a great, modern feel to it with a subtle mix of slightly varying shades and a smooth contemporary surface. It is very good for use in contrasting areas and adding accents to other colours and works well with almost any other colour of brickwork. If you want to use a slightly contrasting mortar the effect of the cream / buff colour of the Burnham can be highlighted.

Sizes Available:-

220mm x 14mm x 65mm = 60 slips per m² and 14 corner slips per lin mtr

220mm x 14mm x 50mm = 76 slips per m² and 17 corner slips per lin mtr

Samples available on request.
