

# Candiwall Technical Data Sheet

## Candiwall Brick Slips

### Sherwood Smooth Red

All Candiwall brick slips are made from natural clays without using pigments or additives. High performance clays are used to create the best possible finish. Fired at temperatures of 1100°C durability is assured and of course, you can use any of the Candiwall range of slips for internal or external applications.

#### Properties:

- High compressive strength
- Low Water absorption
- High dimensional stability
- Acid resistant
- 100% recyclable

#### Certification:

- Certified to European Standard EN14411

## Packing

Slips are packed in cardboard boxes. Weights and dimensions shown below.

Product	Dimensions	Weight per unit	Weight Per box	Quantities assuming 10mm joint
Stretcher Slips All styles	220x14x65mm	0.36Kgs	22 Kgs	60 slips /m <sup>2</sup>
Corner Pistol Slips All Styles	220/105x14x65mm	0.54Kgs	8 Kgs	14 corners per lin mtr
Stretcher Slips All styles	220x14x50mm	0.28Kgs	22 Kgs	76 slips /m <sup>2</sup>
Corner Pistol Slips All Styles	220/105x14x50mm	0.54Kgs	8 Kgs	17 corners per lin mtr

### SHERWOOD SMOOTH RED

### SMOOTH SURFACE

The Sherwood smooth red shares the warm ambience of the Dallington Red but has a contemporary, smooth finish that is so much in demand at the moment. Clean, sharp lines give an attractive feel that looks great in conjunction with other contemporary construction materials. It can be used very effectively for interior projects as well as for outside façades. With the increasing use and ease of application for brick slips, we are expecting this line to be very popular indeed.

Sizes Available:

220mm x 14mm x 65mm = 60 slips per m<sup>2</sup> and 14 corner slips per lin mtr  
 220mm x 14mm x 50mm = 76 slips per m<sup>2</sup> and 17 corner slips per lin mtr

**Samples available on request.**
